

The competent Röllli Team at your service

Christina Röllli
Management · Chairman

«I appreciate the friendly and trusting relationships that we have built with our customers.»

The best things come in small packages

In our Shop we offer unusual collectors items for the small budget in pristine condition.

The **catalogue** is despatched to 2'500 Swiss customers once a year, all through the year our interested customers are being informed on Philasearch or in our shop in Rothenburg near Lucerne. The **viewing** is barely necessary as all the lots are illustrated in detail on our online platform.

Our process for successful results

Aquisition

Consignments are submitted to us during the whole year by over 300 collectors, banks, administrators of estates, etc. They are sent to us by post or handed over on the occasion of a consultation. A confirmation of receipt is issued immediately once the delivery has been accepted by us. All Items are covered by 'All risk' insurance for posted items as well as hand delivered items.

Detailed description

Following expert processing you will receive a detailed lot description with an estimate of the potential achievable auction price. At this point corrections to the description can still be made. These descriptions will be published in our auction catalogue.

Website

Five to eight weeks before the auction our catalogue is published on our website as a database with all necessary search functions, as well as in PDF format. Our international clientele is informed by newsletter as soon as the data is available on our website. Our auction is also listed on philasearch.com and stampcircuit.com: platforms for over 100,000 philatelists.

Catalogue

Four weeks prior to the auction the auction catalogue is despatched to our 3,000 clients and 200 suppliers. In addition the supplier receives a confirmation with his lot numbers.

Viewing

Before the auction our customers have the possibility to view the auction lots and make thorough calculations in our modern head offices with ideal lighting conditions.

Auction

Our auctions are public and take place in our spacious head offices. Over 1,000 bidders take part in person, by written bids, by telephone, through a commission agent or live over the internet.

Auction results report

The results are regularly updated on our website during the auction. The week after the auction the Swiss customers and all the suppliers will receive a list of prices realised.

Delivery to the Buyer

Thanks to our professional organisation the lots are despatched within one week of the auction. We deliver against prepayment, longstanding customers receive the lots with an enclosed invoice.

Unsold lots

We sell over 85% of the auctioned lots. Lots which did not sell at the auction can be purchased during three weeks after the auction at the starting price plus commission.

Final statement and payment

Six weeks after the auction we issue the final statement. At the same time the payment will follow by bank transfer. After consultation with the seller, unsold lots can be offered in the following auction again or be taken over by us.
